1. Introduction

1.1 Purpose:

The purpose of this document is to present a detailed description of the CPS Accounting System. It will explain the purpose and features of the system, the interfaces of the system, what the system will do, the constraints under which it must operate and how the system will react to external stimuli.

1.2 Scope of Project:

This software has been designed to facilitate proper accounting of contributions pertaining to employees of Chhattisgarh Government / Union Territories and employees of the autonomous bodies working in the state.

1.3 Glossary:

Challan: The instrument used to deposit cash in a bank / Treasury.

Drawing and Disbursing Officer (DDO): Government Official authorized by Accountant General to transact with the Treasury.

Treasuries: Units of fiscal system that transacts with RBI on behalf of State Governments. State Government can draw the money from Reserve Bank of India only through Treasury. Treasury accounts to the RBI for all the transactions made on behalf of the State Government as given in state treasury code.

Employee code: A unique code is allotted to each employee of the State for necessary identification.

1.4 Acronyms:

PPAN	Permanent Pension Account Number
PRAN	Permanent Retirement Account Number
NSDL	National Securities and Depositories Ltd.
NPS	New Pension Scheme
DTAP	Directorate of Treasury, Account and Pension
DDO	Drawing and Disbursing Officer
CPS	Contributory Pension Scheme
PFRDA	Pension Fund Regulatory and Development Authority
CRA	Central Record Keeping Agency
FVU	File Validation Utility
DDOREGNO	DDO registration Number
DTOREGNO	District Treasury Officer Registration Number

1.5 Background:

The Government of India established Pension Fund Regulatory and Development Authority (PFRDA) on 10th October 2003 to develop and regulate the Pension Funds under the New Pension Scheme. PFRDA has appointed National Securities Depository Limited (NSDL) as the Central Record Keeping Agency (CRA) to maintain the records of contribution and its deployment in various pension fund schemes for the employees, Bank of India as Trustee Bank, SBI, UTI and LIC as pension fund manager. It executed deed of New Pension System (NPS) Trust and now NPS Trust came in to existence on 27th February, 2008. Stock Holding Corporation is also engaged for taking care of investing pension amount.

Government of Chhattisgarh decided to adopt the scheme for its new joining employees with effect from 1-11-2004 and accordingly issued notification vide No. 977/C-761/F/R/IV dated 27th October 2004. DTAP is given the responsibility of accounting the monthly contributions made by employees and issue annual information on available fund in his/her account after duly incorporating Employer's contribution and interest calculated there upon. It was decided in January 2006 that the computerized accounting system will be developed for accounting of NPS.

10 % of Basic Pay and DA are to be deducted from monthly salary of each subscriber and equal matching grant from employer is deposited in subscriber's N.P.S. account.

Government of Chhattisgarh has executed agreement with NSDL as CRA on 19th Sept, 2008. In CRA system PRAN is allotted by NSDL. For this first of all, all Drawing and Disbursing Officer's, all Treasury officers and DTAP (as nodal officer / cum pay and account officer PAO) should get registered in NSDL. Registration form is prescribed by CRA. The form for Directorate Treasury, Accounts and Pension is annexure -N1, for Treasury Officers is annexure -N2 and for DDO's is annexure -N3. PFRDA has appointed Stock Holding Corporation of India Ltd. as custodian and Bank of India as trustee bank. S.B.I. pension fund Ltd., UTI retirement solution Ltd.

and LIC Pension Fund is appointed as pension fund manager. For accounting and record keeping, NSDL is appointed as Central Record keeping Agency (CRA).

2. Situation before initiative

As the scheme is introduced fresh into the government system, the process of modalities to implement the scheme were going on till 31-12-2005 and no manual system was maintained/followed for the employees expected to be covered in the scheme. The online treasury computerization (e-Kosh) is effectively implemented with effect from 1-4-2005 across the state. It was decided to build employee database and implement Payroll software with effect from 1-10-2005 with an objective to link salary data of employees with treasury system. It was decided in January 2006 by the government that the New Pension Scheme accounting system be implemented in the state using the existing e-Kosh system built on state-of-the-art technologies.

3. Strategy adopted

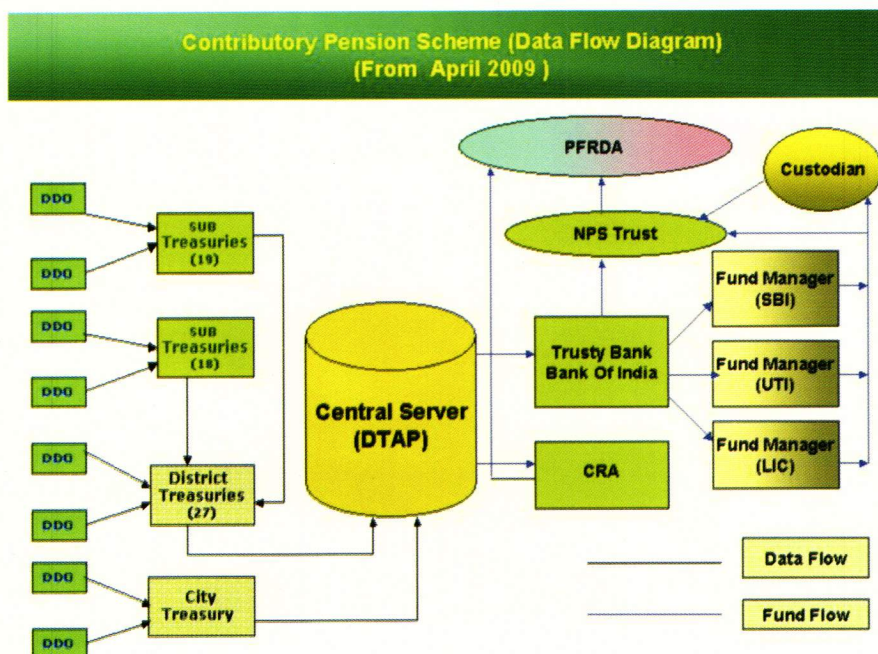

It is decided to introduce computerized accounting system to address the issues of capturing the contributions from monthly salaries of employees, proper accounting and generation of required reports electronically. National Informatics Centre, Chhattisgarh State centre who as a consulting agency designed, developed and provided implementation support to the existing e-Kosh system was approached to design suitable accounting system for the New Pension Scheme. Following issues are to be addressed in the system.

- Employee joined after 1-11-2004 to be allotted unique Permanent Pension Account Number known as PPAN.
- The salaries of employees to be prepared using uniform Payroll software across the state and salary data need to be processed in treasuries through e-Kosh system.
- Treasuries to submit monthly account after due verification and upload to Central Server located at DTAP.
- Separate offline system to be designed for capturing the data pertaining to employees whose salary is drawn outside the treasury system. This data obtained at DTAP to be compiled at state level.

The consolidated data all employees covered under the scheme is to be compiled and government share to be incorporated for each employee and the account to be submitted to Government on monthly basis.

4. System Description

4.1 System Environment:

4.2 Acceptance of forms:

Upto 2009 the system allots unique PPAN for each employee before the salary is drawn from the treasuries and communicated to DDOs online. The 12 digit PPAN consists of Year of joining, HOD Code, running serial number. The forms are collected from DDOs for the newly joined employees, verified at DTAP before allotment process takes place.

Record and account maintenance is entrusted to NSDL with effect from 1st April 2009. Required exercise has been taken up for smooth transition of data to NSDL system without any re-entry of data at any level.

Under the new system from 1st April, 2009 subscriber submits application in annexure S-1 and employee bio-data form in three copies along with photo to DDO for allotment of PRAN and employee code. It is essential for any employee to be registered in employee database for allotment of PPAN/PRAN. The DDO forwards application in two copies to DTAP. At DTAP the details are entered into the employee database for generation of 11-digit employee code comprising 7-digit DDO code and 4 digit running serial number for that DDO. A Departmental 12-digit PPAN is allotted using CPS system at DTAP.

4.2.5 Communication of PRAN:

PRAN data thus updated is made available on the e-Kosh online portal for necessary view by respective employees and DDOs. Subsequently DTAP also communicate to the respective DDOs regarding allotment of PRANs to the employees working in their office. The online reports help to reduce the delay in actual utilization of PRAN of the employee.

4.2.6 Generation and Processing of Salary Data:

DDOs prepare the salary bills using e-Payroll system that validates the employee information based on DDO Code, Employee Code and PRAN. The multi validations help to maintain the accuracy of the data. The hard copies of salary bills thus prepared are taken out, signed by DDO and submitted in respective treasury/sub treasury.

The salary data is transmitted online to treasury system for necessary processing of salaries. No correction of any data is allowed at treasuries. In case of any error found in salary bills, the correction shall take place through e-Payroll only and is subsequently updated at treasury through online means.

Treasury/Sub Treasury process and pass the salary bills and arranges to credit the salaries into employee's bank account using e-Payment system that is being implemented. The Agency Bank forwards the daily e-payment data to DTAP using which treasuries update the voucher data. Reconciliation takes place between the agency bank and treasury and data is finalized for generation of voucher numbers.

4.2.7 Updating CPS Data at Central Server:

The CPS data is uploaded to central server on daily basis from each treasury for periodic verification of data at DTAP during the month. Issues of double drawl of salaries (if any), validity of PRAN and DDO will come up during this stage so that problems can be sorted out immediately without waiting till the end of the month.

CPS Information System - Chhattisgarh - Windows Internet Explorer

At the end of the month, on generation of vouchers at treasuries, district treasury compiles the CPS data comprising contributions of employees covered under treasury and its sub treasuries. Subsidiary registers are taken out, verified and signed by Treasury Officer and submitted in hard copy to DTAP before 7th of subsequent month for necessary consolidation.

Start

Once the data has been verified by DTAP, a text file is generated with taking care of the constraints and norms of the NSDL and its requirements.

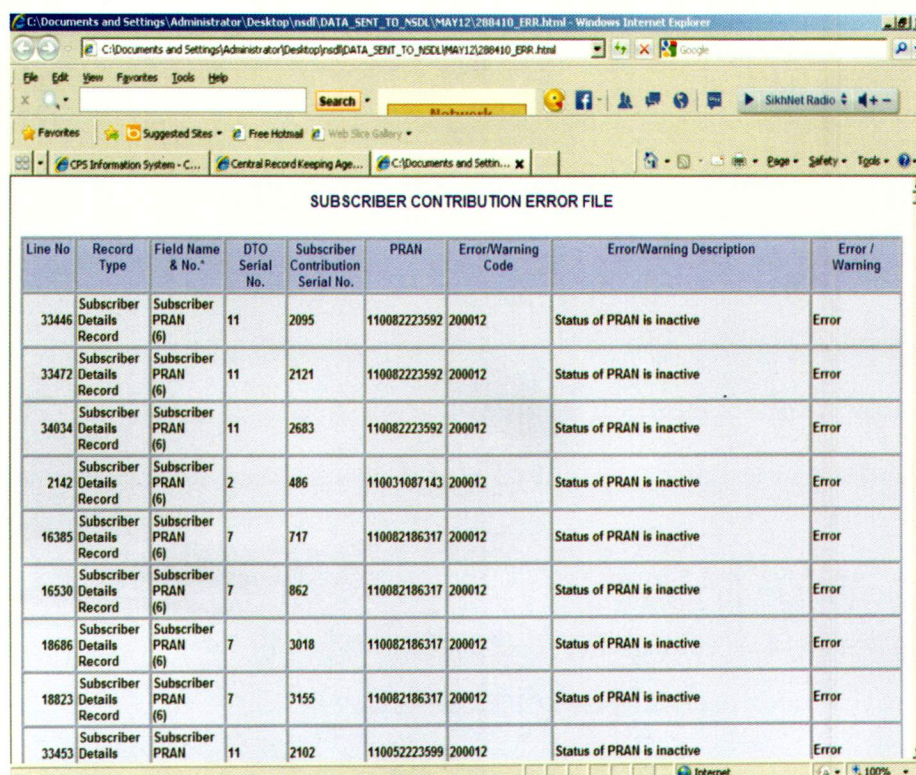

A file validation utility is provided from NSDL to validate the created text file on its constraints. The errors that may arise are resolved accordingly.

Errors may be of several types as follows:

1. The NSDL system accepts the data if it is drawn for any month not older than four years. If the salary drawn is of four years or more old then the salary is to be shown as arrear in the current month.
2. Errors that may exist in text file due to invalid sequence of treasuries, month and year. This type of errors is very less as the existing e-Kosh system takes care of this. After solving the errors (if any) are rectified in the basic data and all corresponding tables and text file is generated again and validated. The FVU utility creates a separate file if there are no errors in the text file. This file is then uploaded to NSDL site for which a reference number is generated by NSDL.

This reference number is used to view the status of uploaded file. Some error may get generated at this time, which may be follows:

1. If the PRAN of the subscriber is inactive or,
2. The subscriber is transferred to some other state,
3. Other miscellaneous errors

The screenshot shows a web browser window with the address bar displaying a file path. The main content area displays a table titled 'SUBSCRIBER CONTRIBUTION ERROR FILE'. The table has 9 columns: Line No, Record Type, Field Name & No., DTO Serial No., Subscriber Contribution Serial No., PRAN, Error/Warning Code, Error/Warning Description, and Error / Warning. The table contains 9 rows of data, all indicating 'Status of PRAN is inactive' as the error description.

Line No	Record Type	Field Name & No.	DTO Serial No.	Subscriber Contribution Serial No.	PRAN	Error/Warning Code	Error/Warning Description	Error / Warning
33446	Subscriber Details Record	Subscriber PRAN (6)	11	2095	110082223592	200012	Status of PRAN is inactive	Error
33472	Subscriber Details Record	Subscriber PRAN (6)	11	2121	110082223592	200012	Status of PRAN is inactive	Error
34034	Subscriber Details Record	Subscriber PRAN (6)	11	2683	110082223592	200012	Status of PRAN is inactive	Error
2142	Subscriber Details Record	Subscriber PRAN (6)	2	486	110031087143	200012	Status of PRAN is inactive	Error
16385	Subscriber Details Record	Subscriber PRAN (6)	7	717	110082186317	200012	Status of PRAN is inactive	Error
16530	Subscriber Details Record	Subscriber PRAN (6)	7	862	110082186317	200012	Status of PRAN is inactive	Error
18686	Subscriber Details Record	Subscriber PRAN (6)	7	3018	110082186317	200012	Status of PRAN is inactive	Error
18823	Subscriber Details Record	Subscriber PRAN (6)	7	3155	110082186317	200012	Status of PRAN is inactive	Error
33453	Subscriber Details Record	Subscriber PRAN (6)	11	2102	110052223599	200012	Status of PRAN is inactive	Error

The errors (if any) are rectified from the table level; text file is regenerated and uploaded to NSDL site. NSDL generates a challan for error free data.

My Computer 100%

The hard copy of the challan is taken out and a bill is prepared as per the challan amount and submitted to treasury for necessary passing. The amount is remitted to designate bank account of NSDL maintained by trustee bank (Bank Of India).

5. Best Practices Followed:

- Allotment of unique PPAN/PRAN to the employee from the initial stages, so that no error occurs at subsequent levels.

- Preparation of salary bills through e-Payroll by DDOs to achieve uniform salary bill preparation across the state.
- Linkage of salary bills with treasury accounting for achieving accuracy of salary data.
- Multi validation checks like DDO Code, Employee Code, and PRAN to ensure 100% correctness of the data.

6. Results achieved:

- Accurate maintenance of CPS account for every employee.
- Timely submission of monthly account to NSDL so that no interest loss happens to employee.
- Central submission of data for entire state instead of submission through nodal offices, which is being followed in some other states.
- Transparency in the system at every stage that the data can be verified by employee, DDO, treasury and finally by DTAP.

7. Replicability of system:

CPS Accounting is a hybrid system that is being followed in the state of Chhattisgarh. The online part of CPS administration takes care of allotment of PRAN, real time communication of PRAN data and other online requirements of DTAP. The offline part ensures that the data is integrated and generated with/through treasury system. For replicability at any other state requires complete computerization of treasuries as per Chhattisgarh model.

8. Sustainability:

There is no maintenance of manual system for CPS accounting. All the required reports generated through processed data. DDOs and treasuries are completely dependent on the system. The system saves a lot of time for DDOs, Treasuries, and DTAP in maintaining various reports from time to time. No extra manpower is available at DDO/Treasury level and minimum manpower is kept at state level to run the system. Thus the system is highly sustainable and cost effective.
